- Small group centres with some one-on-one math instruction
- Affordable for families
 - \$50 Program Fee + \$50 Annual Membership fee
 - *Subject to change
 - *Subsidy available
- Offered in St. Catharines from May 1st - June 20th

Example of Improvement on Number Magnitude, Computation Strategies and Math Applications for One Program Participant

Evidence Based

"Before starting in the S.M.A.R.T. Math program, our son had a strong dislike for math, mostly due to his lack of confidence with math. He would easily become frustrated with the simplest of equations. Since he has been enrolled in SMART, we have noticed less anxiety and frustration with math. When answering questions, he is much more confident and struggles less. Although he still doesn't love math, this program will make his success in it easier."

- Program Parent, S.M.A.R.T. 2017

"We are very grateful for the S.M.A.R.T. math program, LDANR staff and the funders who have made it possible for my daughter to receive additional supports and tools from S.M.A.R.T. She has begun to excel at school due to this wonderful program!"
